

EurOcean_LEXI

EUROPEAN LARGE EXCHANGEABLE EQUIPMENTS

Description

This sampler is a standard version of the Oktopus GmbH, with a square section of 50 by 50 cm (0.25m²). Allows a sampling with a maximum volume of 0.125 m³ of superficial sediments (up to 50 cm deep) with a good preservation of the sediment-water interface. Contains a removable lateral panel, which permits the visualization of the sedimentary structure.
